Subject: Annual Performance Review

Dear Professor Monrose,

I have completed the review of your performance as a faculty member of the School of ECE over the past year, considering a number of factors, including teaching, student advising, scholarship, research, and service. The review incorporates comments and feedback from a committee of your peers.

I am delighted to report that your performance has been outstanding across all dimensions. I would like to highlight and commend the following specific achievements:

- Productive scholarly work and contributions to research, as evidenced in the publication of 8 conference papers in top-tier venues.
- Oversight and management of the Center for Cyber Operations Enquiry and Unconventional Sensing (CEOUS) center.
- Mentorship of undergraduate students within CEOUS center.
- Strong research program, particularly your funding support for 5 Ph.D. and 4 MS students and involvement in multiple sponsored research programs.
- High performance in teaching of the newly developed course "Advanced Computer Security," reflected in near-perfect CIOS scores.
- Spearheading co-curricular educational initiatives, offering undergraduates valuable opportunities through 12-week summer internships and academic year assistantships.
- Contribution to service activities at Georgia Tech, including serving as the Computer Security Special Interest Group (CSS TIG) representative on the ECE Graduate Admissions committee and participating in faculty recruitment efforts for the School of Cybersecurity and Privacy.

Based on the package you submitted, here are your annual review ratings, as per rubric outlined in the School of ECE Standards for Faculty Annual Review.
Research: 5
Teaching: 5
Service: 4

Congratulations on a successful year, and I look forward to supporting your activities in the future. Your dedication and contributions are invaluable to the School of ECE's mission and success.
