Georgia Tech College of Engineering
School of Electrical and Computer Engineering

March 30, 2026

Subject: 2025 Annual Performance Review

Dear Professor Monrose,

I have completed the review of your performance as a faculty member of the School of ECE over the past year, considering a number of factors including teaching, student advising, scholarship, research, and service.

I am delighted to report that your performance has been exemplary. I would like to highlight and commend the following specific achievements:

- Leadership of the research activities for the Center for Cyber Operations Enquiry and Unconventional Sensing (CEOUS) center.
- Productive scholarly contributions and groundbreaking research, demonstrated by 6 accepted or published conference papers, 6 additional papers submitted, and a provisional patent filed.
- Dedicated advising and mentoring of two post-doctoral researchers, 6 doctoral students, one MS student who graduated this year, and two undergraduate students, as well as several students in the CEOUS center.
- Active engagement in sponsored research, including involvement in three major grants from DARPA and the U.S. Navy, along with the submission of two collaborative research proposals.
- Outstanding teaching contributions, including a perfect CIOS score for a newly developed graduate course and the successful deployment of a virtualized educational platform for hands-on cybersecurity instruction. Your innovative, gamified course design—featuring an in-person panel judging event—resulted in highly impactful student outcomes.
- Significant service contributions within Georgia Tech and to the broader professional community, including serving on program committees for ACM conferences, participating in the ECE Graduate Student Recruitment Committee and multiple faculty recruitment subcommittees, contributing to thesis committees, and receiving the Distinguished Reviewer Award from the ACM Conference on Computer and Communications Security.

Based on the package you submitted, here are your annual review ratings, as per rubric outlined in the School of ECE Standards for Faculty Annual Review.
Research: 5
Teaching: 5
Service: 5
